

2015 Global Forum Announcement

Represent your school and country with pride and get the most out of your ISS experience!

At every SKKU International Summer Semester (ISS) a Global Forum is held to provide participants with an opportunity to debate a topic associated with the theme of the ISS. The topic of the Global Forum is **'Implementing social welfare policies hinders economic and financial growth in developing countries'**

Those who wish to participate must form teams of four and submit a one-page position paper with up to two accompanying PPT slides by midnight July 9th.

Choose a side:

PRO: Agree that it is usually better for the people of a developing nation to implement social welfare policies instead of those which only support economic and financial growth

CON: Agree that it is usually better not to implement social welfare policies and instead favor economic and financial growth as the best way to serve the people of a developing nation

The first round will be held July 13th and the final debate will be held on July 22nd. The winning team will be given a cash prize and the runner up will receive a souvenir.

***Send sign-up sheet to intlans@skku.edu**
